

Can you please arrange to put this report on Covent Garden on our website? It probably is indicative of the damage that we might have seen on Heatherwood Court. I am hoping to hear from Ken in the near future with some field information.

Please include a statement that says we don't have any direct information from anyone in Hollybrook.

Power is out, Wi-Fi is out, and cell phone service is very sporadic.

Subject: FW: Preliminary status report for Covent Garden

While this report provides overall very good news, I encourage each property owner to arrange for a full inspection of the interior of their units at the earliest possible time. It's not easy to spot all damage from the street. Power is still out. I think it went out around 5 pm last evening, at the absolute height of the storm.

Not too bad at CG. Structures at entrance destroyed. Couple of Roof Tile missing. Roofs still intact. Some trees down. Twin Eagles Blvd blocked with lots of downed trees. Had to be creative to get back here. We were very fortunate. Some standing water in streets. No flooding of units. One street Light damaged and Light fixture fallen. Soffits damaged and missing on Mail box kiosk. Still some relatively minor winds. Lots of flooding of the roadways on Twin Eagles Blvd.
