

Good afternoon,

Mowing: All Residential & Common areas were completed this week to continue weekly mowing services. This complete weekly mowing cycle will continue through the growing season until we resort back to bi-weekly mowing's November 2021.

Bed Weeds: Handing pulling and herbicide spraying in beds continued as we move through properties to try and control weeds through the growing season. I am getting Jose and co. to get on schedule to spray for weeds so that we can control these aggressive weeds year-round.

FERTILIZER/IPM: Pedro will be in the area to spray turf grass on Friday 9/3, for weeds (Weather pending)

Debris Pick-up: Debris pick was completed after our mowing cycle.

Additional Topics: The trees that were tilted or blown over have been re-staked. If there are any that we may have missed, feel free to contact me and we will upright it as soon as possible.

Have a great weekend!

Jorge
